

# WHAT YOU CAN'T SEE CAN HURT YOU

## *The Dangers of Unknown Malware*

### KNOWN MALWARE

*Just the tip of the iceberg*

**EVERY 6 MINUTES**  
known malware is downloaded

Known malware is typically handled by traditional solutions including anti-virus, anti-bot, firewalls and intrusion prevention systems.

**86%**  
of organizations access a malicious site

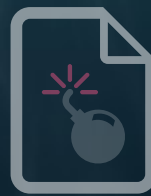

### UNKNOWN MALWARE

*What Lies Beneath*

**EVERY 34 SECONDS**  
unknown malware is downloaded

Unknown malware includes advanced persistent threats and zero-day attacks that do not have previously known protection signatures. Unknown malware infiltrates systems and networks, remaining undetected by traditional antivirus and intrusion prevention systems.

**41%**  
of organizations downloaded at least one infected file with unknown malware

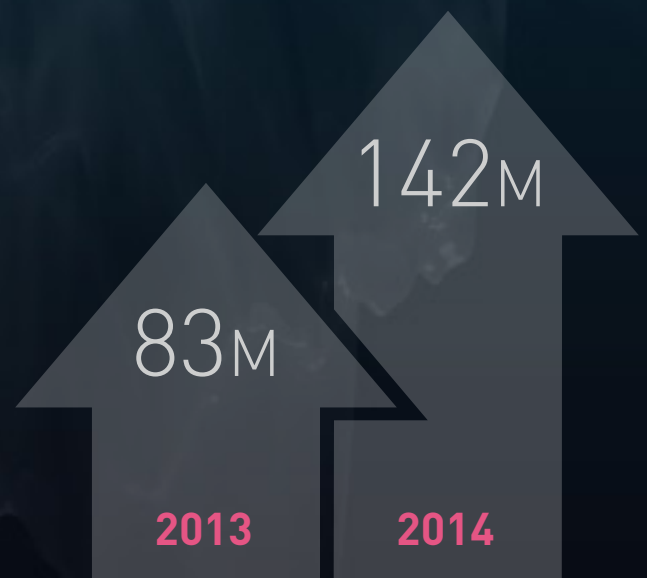

**106**  
unknown malware hit an organization every hour

## DEFEAT THE UNKNOWN

*How can we defeat the unknown?*

Sandboxing catches more unknown malware than any other solution on the market. By providing a deep analysis that antivirus, IPS, and firewalls simply can't deliver it detects and blocks unknown malware before it affects your network.

**71% INCREASE**

*Unknown malware is expanding at astounding rates*
